# Team & Instructor Sign-off Register

*DEPI AI for Healthcare · Signatures and actual decisions must be completed by humans*

### Status at handoff

This package consolidates drafted submission documents and observed synthetic prototype evidence. It is NOT a signed or instructor-approved final submission. The guideline requires five workflow owners, documented tests, phases/checkpoints, and a business pitch. The team reports instructor permission to implement the five owned functions as one integrated n8n workflow; attach proof of the exception.

### Component ownership and acknowledgments

| Functional owner area | Full team member name | Signed / date |
|---|---|---|
| **C1 · Study + variable schema** | [NAME REQUIRED] | _____ |
| **C2 · Voice/text intake + safety** | [NAME REQUIRED] | _____ |
| **C3 · Schema-constrained extraction** | [NAME REQUIRED] | _____ |
| **C4 · QA / LangSmith / monitoring** | [NAME REQUIRED] | _____ |
| **C5 · Human approval + XLSX** | [NAME REQUIRED] | _____ |

### Additional shared roles

| Role | Owner | Accepted / date |
|---|---|---|
| **Team Lead** | [NAME REQUIRED] | _____ |
| **Integration Owner** | [NAME REQUIRED] | _____ |
| **Evaluation Owner** | [NAME REQUIRED] | _____ |

### Owner acknowledgment

By signing, each owner confirms their one-page component document describes their actual contribution and that every test marked “passed” has a valid expected/actual result and genuine evidence. Unsigned test rows remain pending.

### Five instructor checkpoints

| Phase | Submitted evidence | Instructor result / date |
|---|---|---|
| **1 · Business discovery** | Business Brief + KPI draft | PENDING / _____ |
| **2 · Solution design** | Feature list, five spec cards, integration/safety/evaluation plans | PENDING / _____ |
| **3 · Build** | Integrated n8n export + five one-page owner documents + test records | PENDING / _____ |
| **4 · Integration/testing** | 3 scenarios, human/AI scores, LangSmith, dashboard, KPI results, issue log, video | PENDING / _____ |
| **5 · Business pitch** | Deck, five presenters, live demo | PENDING / _____ |

### Requested architectural exception confirmation

Single integrated workflow containing five clearly documented, independently owned functional areas; please attach prior written permission or record an instructor endorsement here.

Instructor confirmation / date: _____

### Known uncompleted evidence at the time of packaging

- Two independent reviewers have not yet submitted ratings or calibration notes.
- Formal owner-by-owner 3 normal + 1 edge + 1 unsafe records are not all signed off.
- All three full-system scenarios and per-step LangSmith tracing are not demonstrated by current material.
- Business KPI actuals/baseline times are unmeasured; 8→5 minutes is only a working assumption.
- Backup video has not been provided; no instructor checkpoint signature is recorded.

Guideline basis: Graduation Project Guideline: AI for Healthcare (Oct 2026), pages 1–10; current prototype evidence and prior submission batches. All patient/case test details are fictional.
